📇 PROFILE

Results-driven Software Engineer specializing in PHP Laravel with a foundational understanding of e-commerce, accounting, and ERP systems. Proficient in backend development with PHP Laravel and familiar with frontend technologies, including basics of Angular. Proven ability to design and implement efficient and scalable software solutions.

💼 PROFESSIONAL EXPERIENCE

Back-End Developer, *etolv*
04/2021 – present | Cairo, Egypt

- pearheaded the development of back-end functionalities for e-commerce solutions, ensuring seamless transaction processing, order management, and inventory control.
- Developed a specialized Manufacturing Stages Management software module, optimizing production workflows and enhancing coordination between different manufacturing stages.
- Played a pivotal role in designing and implementing back-end modules for ERP software, contributing to the overall efficiency of business processes.
- Specialized in the development and enhancement of a full-fledged accountant module within the ERP software, addressing financial tracking, reporting, and compliance requirements.
- Managed and optimized databases to handle extensive data related to e-commerce transactions, ERP modules, and accounting records.
- Engineered scalable solutions and conducted performance optimization to handle growing data volumes and ensure system responsiveness.

Back-End Developer, *ARG Group Co*
01/2023 – 04/2023 | Remotely

- Led the development of back-end functionalities for a dynamic ads software platform, facilitating targeted advertising campaigns and optimizing ad delivery.
- Collaborated closely with front-end developers to ensure a cohesive integration of back-end functionalities with the user interface, enhancing the overall user experience.
- Engineered scalable solutions and conducted performance optimization to accommodate the growing data volumes associated with ads transactions and ensure optimal system responsiveness.

Training, *Ipda3 Tech*
06/2020 – 08/2020 | Cairo, Egypt

- Utilized PHP Laravel as the primary backend framework for robust and scalable application development.
- Worked closely with cross-functional teams, including frontend developers and designers, to ensure seamless integration of the frontend and backend components.
